Application Serial No. 10/797,852 Application Filing Date: 3/10/2004 Attorney Docket: 74200.926CIP

This listing of claims replaces all prior versions and listings of claims in the application.

Listing of Claims:

1-37. (Cancelled).

38. (Currently amended) A web accessible remote control apparatus for

providing web based remote control of non-web enabled electronic devices comprising:

a first serial port configured to transmit remote control commands over a first

serial link to a second serial port of a first remotely controllable non-web enabled

electronic device, said first remotely controllable non-web enabled electronic device

configured to be controllable by remote control commands received at said second serial

port from a first remote control, said first serial port further configured to receive status

information from said first remotely controllable non-web enabled electronic device over

said first serial link;

a third serial port configured to receive remote control commands for remotely

controlling said first remotely controllable non-web enabled electronic device over a

second serial link from a fourth serial port of said first remote control;

a contention manager configured to provide control of said first serial port and

said third serial port for a first period of time to a pass through service configured to

create a bi-directional path between said first serial port and said third serial port for

passing said remote control commands unaltered first data received over said second

serial link from said first remote control at said third serial port through said first serial

Application Serial No. 10/797,852 Application Filing Date: 3/10/2004

Attorney Docket: 74200.926CIP

port over said first serial link to said first remotely controllable non-web enabled

electronic device and for passing said status information unaltered second data received

at said first serial port from said first remotely controllable non-web enabled electronic

device through said third serial port to said first remote control;

a web server configured to serve a web page providing a user interface for

remotely controlling said first remotely controllable non-web enabled electronic device

by sending remote control commands from said web accessible remote control apparatus

through said first serial port over said first serial link to said first remotely controllable

non-web enabled electronic device.

39. Cancelled.

40. (Currently amended) The web accessible remote control apparatus of claim

38 wherein said contention manager is configured to prevent access by one or more

services operating within said web accessible remote control apparatus to said first serial

port while a remote control command received from said first remote control via said

third serial port is being passed through to said first serial port.

41. (Previously presented) The web accessible remote control apparatus of claim

40 wherein said one or more services comprise an event monitoring service for

monitoring a status of said first remotely controllable non-web enabled electronic device.

Application Serial No. 10/797,852 Application Filing Date: 3/10/2004 Attorney Docket: 74200.926CIP

42. (Currently amended) The web accessible remote control apparatus of claim 38 further comprising a buffer configured to temporarily store <u>data remote control</u>

commands received at said third serial port.

43-44. Cancelled.

45. (Previously presented) The web accessible remote control apparatus of claim

38 wherein said web server is configured to provide status information about said first

remotely controllable non-web enabled electronic device via said web page.

46-52. Cancelled.

53. (Original) The web accessible remote control apparatus of claim 38 wherein

said first remotely controllable non-web enabled electronic device comprises a video

projector.

54. (Original) The web accessible remote control apparatus of claim 45 wherein

said first remotely controllable non-web enabled electronic device comprises a video

projector.

55. (Original) The web accessible remote control apparatus of claim 54 wherein

said status information comprises lamp hour usage information.

- 4 -

Application Serial No. 10/797,852 Application Filing Date: 3/10/2004

Attorney Docket: 74200.926CIP

56. (Original) The web accessible remote control apparatus of claim 38 wherein

said remote control commands comprise commands for video input source selection.

57. (Original) The web accessible remote control apparatus of claim 38 wherein

said first remotely controllable non-web enabled electronic device comprises a DVD

player.

58. (Original) The web accessible remote control apparatus of claim 57 wherein

said remote control commands comprise commands for play, fast forward, rewind, pause,

and stop.

59. (New) The web accessible remote control apparatus of claim 38 wherein said

first and third ports comprise serial ports.

60. (New) The web accessible remote control apparatus of claim 59 wherein said

second and fourth ports comprise serial ports.

61. (New) The web accessible remote control apparatus of claim 60 wherein said

first link comprises a serial link.

62. (New) The web accessible remote control apparatus of claim 61 wherein said

second link comprises a serial link.

- 5 -

Application Serial No. 10/797,852 Application Filing Date: 3/10/2004 Attorney Docket: 74200.926CIP

63. (New) The web accessible remote control apparatus of claim 38 wherein said first data comprises remote control commands.

64. (New) The web accessible remote control apparatus of claim 63 wherein said second data comprises status information.
